Cause of Cost Increases

In April 2025, President Trump imposed broad tariffs, which raised some prices. At the end of 2025, Trump eliminated tariffs on coffee, beef and other groceries but prices for them continued to increase. And there are no tariffs on many things – electricity, gasoline, housing – about which Americans are most upset about high prices.What do you think is the main cause of higher prices:

Congressional Tariffs

If another country is selling goods cheaply into the US and undercutting local producers, do you [favor or oppose] Congress putting tariffs on the imports to protect local business?

Trade Statement Recoded

1. Americans should aim to buy goods at the lowest cost, even if that means buying from other countries and undercutting American producers. 2. It is important to be able to make in America more of the products that we need, even if that means we may have to pay more.

Messaging Survey - November 2026 Wave - Democracy Corps - Jewish Sample

Online sample of 523 jewish voters fielded from October 28 to November 06, 2026.

Margin of error: +/-5%.

YouGov Blue

This survey is based on 523 interviews conducted by YouGov on the internet of jewish voters. The sample was weighted according to gender, age, race/ethnicity, education, religion, 2026 election results, state of residence and 2024 presidential vote, based on targets provided by Democracy Corps. Respondents were selected from YouGov's online panel to be representative of 2026 jewish voters. The weights range from 0.03 to 4.41 with a mean of 1 and a standard deviation of NA.

The margin of error (a 95% confidence interval) for a sample percentage p based upon the subsetted sample is approximately 5%. It is calculated using the formula:

$$\hat{p} \pm 100 \times \sqrt{\frac{1 + \text{CV}^2}{n}}$$

where CV is the coefficient of variation of the sample weights and n is the sample size used to compute the proportion. This is a measure of sampling error (the average of all estimates obtained using the same sample selection and weighting procedures repeatedly). The sample estimate should differ from its expected value by less than margin of error in 95 percent of all samples. It does not reflect non-sampling errors, including potential selection bias in panel participation or in response to a particular survey.
